

Sani-Lux Portable Toilet

Experience a superior standard in portable sanitation with the **Sani Lux** - a commitment to quality, practicality, and innovation.

- ✓ Meets international and local sanitation standards
- ✓ Injection molding process to ensure rapid production and readily available stock
- ✓ Designed for ease and economy, the flat-packed Sani Lux not only reduces transportation costs but also offers swift, user-friendly assembly
- ✓ Spacious interior & seamless surfaces for quick cleaning
- ✓ Uncompromised focus on privacy and security

key features

SANITATION STANDARDS COMPLIANT

The Sani Lux toilet has been designed to meet international portable sanitation standards, including UNE EN 16194:2012, while also adhering to local regulations.

PRODUCED LOCALLY

The Sani Lux toilet is manufactured locally in Gauteng utilising an injection molding process, which greatly accelerates production time. Moreover, we maintain a substantial holding stock ready for immediate assembly to meet our customers' growing demands.

EASY TO TRANSPORT & ASSEMBLE

The Sanilux toilet offers a cost-effective flat-packed option, significantly cutting transportation expenses. With this compact version, you can transport parts for 100 units in a single superlink truck, as opposed to just 32 fully assembled units, leading to substantial savings in logistics. Assembly is quick and easy to master. Our expert team can train two or more individuals to efficiently assemble the units in just one day. Designed with convenience in mind, the Sanilux comes with floor skids, making it ideal for transportation by forklift or pallet truck.

EASY TO CLEAN

The cabin's smooth, seamless inner surfaces make the unit much easier and quicker to clean.

SPACIOUS INTERIOR

The cabin offers a generous interior space with a floor area of 1 square meter and a ceiling height exceeding 2 meters at its highest point. This ample size enhances the user experience, providing a sense of openness. Additionally, the opaque roof allows natural light to permeate the space, creating a well-lit environment.

PRIVATE & SECURE CABIN

When the cabin is closed, it ensures complete privacy by preventing any view from the outside. Enhancing the user's peace of mind further, the Sani-lux toilet features an internal 'OPEN-CLOSED' safety latch. This mechanism displays a 'RED-OCCUPIED' sign externally, clearly indicating when the restroom is in use.

EXTENDED USAGE TIME

The increased tank capacity of 230 liters extends the duration of use before servicing is required.

IDEAL BRANDING OPPORTUNITIES

The expansive flat plastic surfaces on the exterior are perfect for affixing stickers or signs to showcase ownership and branding. Additionally, the door area is well-suited for permanent corporate branding through engraving.
