Product Range

NIC (New Improved Concept)

- Freestanding - operates without cables, pipes or connections to water or electricity
- More hygienic for user and servicing team
- No exposure to waste
- Locally manufactured
- Lock outside as well as inside unit for protection (woman in mining)
- Wash basin can be fitted
- Unit can be fitted with all hygiene equipment e.g. Sani bins
- Unit can be assembled underground to cater for areas with height restrictions

* Also available in Mini NIC at a length of 1.8m

* Also available in reusable cartridges or pump out tank.

Mondo Unit

- Spacious, well ventilated interior to reduce odours.
- Combination of floor and moulded in-wall vents promote continuous airflow
- Low maintenance, easy to service with a long history of durability
- Parts made from high density polyethylene
- Large 265L waste tank
- Moulded in-vent screens
- Unbreakable corner construction
- Unbreakable stand over urinal
- Convenient door hook
- Multiple flushing options

NIPS

- Flat packed, easy to transport.
- Easy on-site assembly site as panels lock together.
- Removable drum for easy access
- Made from High Density Polyethylenen (HDPE)
- Locally manufactured

Product Range

Trailer Unit

- Hand wash station with fresh water (100l)
- 250l waste capacity
- Unique ventilation system
- Mobile – easy to move
- Fitted with toilet roll holder, hand wash basin, soap dispenser and paper towel dispenser
- Portable Baby Changing Station

Septic Tank and Conservancy Tank Servicing

Sanitech's fleet of vacuum tankers can be used to service existing septic tanks and conservancy units.

- Services are done by using the latest in pump truck technology
- Hygienic
- Eco friendly
- On-site services available
- Adherence with all local bylaws
- Largest available fleet
- Customised to site specific requirements
- Strictly maintained under a fleet management programme

- All vehicles fitted with vehicle tracking
- All vehicles fitted with spill kits
- All drivers adequately trained and certified as per transport legislation and equipped with correct PPE
- All trucks fitted with vented exhaust system to eliminate odours

Vehicles

*These are a few examples from the Sanitech vehicle fleet.

2000L Isuzu Truck

- 2000l waste capacity
- Used for small to medium sites
- Suitable for residential areas
- Equipped with high pressure cleaners
- Combination type vehicle fitted with hydraulic lift, where applicable to assist with deliveries and transport of units

4 X 4 Pump Truck

- 5000l and 14000l waste capacity
- Used for large to medium sites
- Equipped with high pressure cleaners
- Suitable for difficult terrain areas (mines / rural projects / dams etc) with limited road access

3000L Croner Truck

- 3000l waste capacity
- Used for small to medium sites
- Suitable for residential areas
- Equipped with high pressure cleaners
- Combination type vehicle fitted with hydraulic lift, where applicable to assist with deliveries and transport of units

Toyota Hino 614 Service Vehicle

- Vehicle dimensions allow for more efficient operation
- Capacity to carry a fully loaded deck of toilets as well as pull a fully loaded 10 toilet trailer – eliminating the additional costs of using a larger vehicle.

5000L / 14000L / 28000L Truck

- Used for medium to large sites
- Equipped with high pressure cleaners
