

Sanitech

Khusela Dry Sanitation Unit

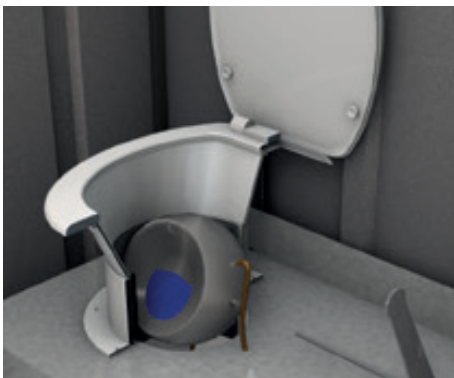

A groundbreaking alternative to conventional open pit latrines

Effectively resolves health & safety issues, streamlines installation processes, & simplifies maintenance procedures

- ✓ Ensures zero environmental and underground contamination
- ✓ Requires no pit for installation
- ✓ Easily relocatable, with minimal civic requirements
- ✓ Features a secure, sealed service hatch to prevent any waste exposure to users

key features

ROTATING BOWL

- Effectively reduces unpleasant odors
- Enhances overall cleanliness
- Prevents foreign objects from entering the system
- Deposits waste into a 1500 litre sealed bladder, ensuring no user contact

THE BLADDER

- Highly durable and easy to replace
- Adaptable to varying sizes, capable of holding up to 1500 liters of liquid waste
- Guaranteed lifespan of 3-5 years
- Prevents underground water contamination

TAMPER PROOF SERVICE HATCH

- Only accessible to the services team
- Aids in the prevention of disposing foreign objects into the toilet
