**Subject: An Exciting Update from Green-Tech**

Dear Valued Customer,

Green-Tech Water and Waste Technology (Green-Tech) has officially joined the Sanitech family. This integration marks an important step in strengthening our technical capabilities and expanding the solutions we can offer to our clients across South Africa.

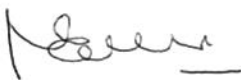

Founded in 1974 as South Africa's first portable toilet hire company, Sanitech brings over 50 years of industry experience. In 2014, Sanitech established a water and waste treatment division and has successfully implemented various water and waste treatment facilities across sub-Saharan Africa.

The partnership now enables us to leverage this extensive expertise within a broader national framework, providing you with access to more advanced, efficient, and dependable solutions. This integration means you will continue to receive the same trusted service and support, while gaining access to more advanced water and waste treatment solutions through flexible procurement and financing options. Our commitment to quality and reliability is further strengthened through Sanitech's ISO-accredited systems and operational excellence.

We are confident this step will make sustainable, high-quality water and waste treatment solutions more accessible; while continuing the personal, reliable service you have come to expect from Green-Tech. If you have any questions or would like more details about how this integration benefits your operations, please feel free to contact us.

Thank you for your continued trust and support. We look forward to this exciting next chapter and to delivering even more value to you.

Warm regards,

Robert Erasmus  
Managing Director

Paul De Klerk  
Divisional Manager for Water & Waste Solutions
